

Aerial Work Platforms

Aerial Work Platforms - There are lots of accessories meant for forklifts which can be utilized to help expand the functionality of your lift truck and allow you to carry stuff, handle materials with less effort or to accomplish clean-up tasks.

Lots of the accessories are specifically designed so as to fit on the forks themselves. Blade extensions for example, are used whenever you need much more blade length, that increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are another variety used whenever moving rolled material so as to make sure it does not roll off of the standard flat blades.

Lifting attachments can be pivoting and telescoping crane accessories. They come in numerous kinds. These attachments are normally designed for transferring lumber, metal bars, poles or whatever kind of bulky items. Other attachments like for example various styles of hook plates and hooks are offered to pick up things making use of a sling or chain. Slab lifters and magnetic filters are other items which could be utilized along with hook accessories. Slab lifters are specialized attachments which are intended for picking up various materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that connect to your forklift in order to make transporting rolls of carpet a lot easier. The accessory hooks onto the lift truck's blades and has a pole that goes through the middle of the carpet roll.

There are many types of lift truck accessory meant for facility maintenance like for example snow blades. These industrial blades can be connected to front end loaders and used for transferring materials like snow, dirt as well as mulch. Other common cleanup attachments include standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the forklift forks connect onto for sweeping large spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up fast and simple.

A material spreader is one more forklift accessory which is often utilized at facilities. These spreaders are useful for various applications like spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Another optional lifting attachment are work platforms. These can be utilized by a lot of different businesses day after day. Platforms may range in size from 36" x 36" to up to 60" x 60". Some units may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location making use of the lift truck. Larger platform units have additional space for staff to be able to bring tools and other essential stuff meant for the job. Normally work platforms are made of poly material or steel.
